What are the contribution gauges for?	2

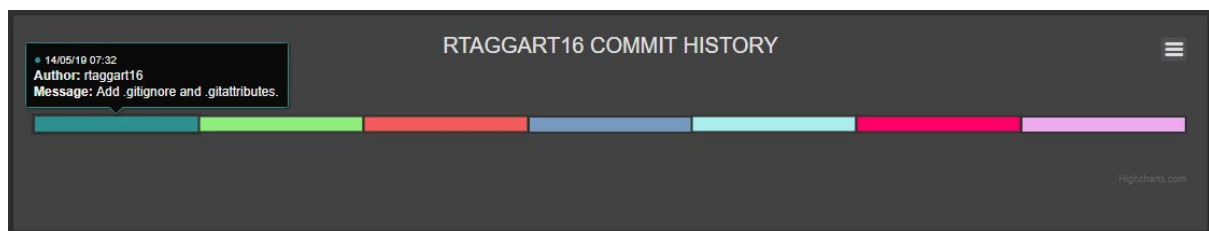

FAQs

What is the top-level information for?

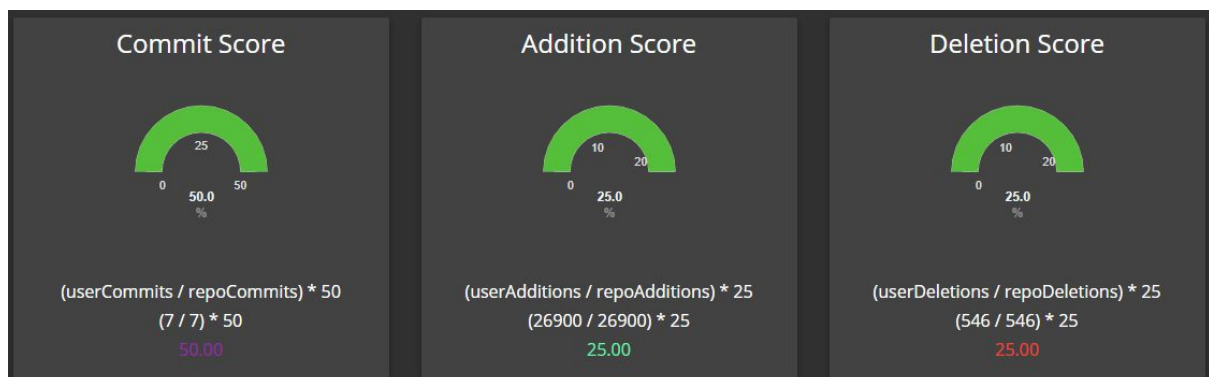

The top-level information of the collaborator displays their stats (commits, additions and deletions) compared to the totals of the repository. The gauge chart displays a visual representation of the collaborator's contribution score out of 100.

What is the commit timeline?

The commit timeline visualises a chronological timeline of a collaborator's commits for the given request. The tooltip of each commit displays the date and time it was made as well as the author and the message of the commit.

What are the contribution gauges for?

The contribution gauges provide a breakdown of each score that makes up the overall contribution score (commit, addition and deletion) in a gauge chart as well as a formula that details how each was calculated.
